Liancheng Fang

Research interest Theory and application of machine learning and data mining algorithms, computational mathematicas and statistics.

Experience

Jan 2018- May 2018, advised by Wai Tong(Louis) Fan
Proposed a hybrid method for well-mixed chemical reaction systems.

Aug 2016 - July 2017, Guangdong Province Key Laboratory of Computational Science
Improve and recreate a software to diagnose myocardial infarction based on ECG, in which I clean raw data and implement CNN to distinguish heart waves.

Education

2014 - 2017, Sun Yat-sen University
undergraduate major in applied mathematics

2017 - 2018, University of Wisconsin-madison
Visiting International student

2018 - present, University of Wisconsin-madison
Masters Program Foundations of Advanced Studies

Skills

Programming language

- C
- C++
- Python
- Java
- R
- Matlab
- Latex

Computer software

- Microsoft Office
- Visual Studio
- Eclipse
- Xcode
- Sublime
- Emacs
- ...

Something other

I am applying for graduate school in 2018FALL.
